

DECISION FOCUS 7.0

Frequently Asked Questions

Q&A

What new features are included in version 7.0?

Several new features have been added to this version:

- Hyperlinks and Attachments – You can now link documents, folders, web content or any other file to any Decision Focus worksheet cell.
- One-step Bundling – A Decision Focus worksheet file containing multiple links and attachments can easily be shared with other users.
- Decision Analysis Graphics – Display important decision criteria in a variety of graphical formats.
- Enhanced Decision Risk Analysis – To make sure decision objectives are met, risks are considered and mitigation plans addressed prior to making an important decision.
- One Click Management Reports – Create professional, multi-page management reports instantly.
- Expanded Action Manager – this tool has been expanded to allow for better creation, tracking and control of Decision Focus action plans.

What other updates are included in this release?

The following stability updates and improvements are included in version 7.0:

- Some users running Decision Focus software on notebook pc's with Intel's new dual core processors were experiencing errors resulting in slow keyboard response. The problem was detected only on certain dual core configurations. This issue has been resolved.
- Better screen visibility in Situation Analysis.
- More efficient page breaks for printing worksheets in Problem Analysis.
- More space for naming of alternatives in Decision Analysis.
- Better print layouts for Decision Analysis.
- Elimination of minor errors when using the right-click functions in Decision Analysis.
- Elimination of a possible shut down error when accessing the Notes page in Situation Analysis.

Is this version 7.0 of Decision Focus compatible with the Vista operating system?

Yes. This version is fully compatible with Vista, and will also operate on Windows XP and Windows 2000 systems.

Can Decision Focus 7.0 read files created in previous versions?

Yes, files that were created in earlier versions will be automatically updated to the 7.0 version.

If a file is created in Decision Focus 7.0, can it be converted to a Decision Focus 6.0 file so users of that version can read it?

Yes. Decision Focus 7.0 has a special "Convert to 6.0" feature that allows you to do this.

Can I export Decision Focus 7.0 worksheets to other file formats?

Yes, Decision Focus worksheets can be easily exported to Word, Excel, PowerPoint, or Acrobat using the "one-click" export option. This allows you to communicate your Decision Focus analysis in virtually any format you choose.

What is the cost of a new Decision Focus 7.0 license?

A Decision Focus 7.0 single user license is \$495.00.

What is the cost of an upgrade to version 7.0?

For existing Decision Focus 6.0 license holders, the version 7.0 upgrade is \$95.00. For holders of version 5.0 or earlier, the cost is \$295.00.

How do I know which version of Decision Focus I currently have?

On the main menu bar, click "Help", then click "About Decision Focus Software."

How do I obtain an upgrade to Decision Focus 7.0?

You can purchase the upgrade online at www.FocusTools.com/orderonline.cfm, or call 952-595-8000. Note: you must have a valid Decision Focus 6.0 or 5.0 software license and serial number to qualify for upgrade pricing.

Where can I get training on Decision Focus and Decision Focus software?

Training is available in classroom, web class, and self study formats. Individual coaching in Decision Focus is also available. For more information and pricing, go to FocusTools.com or call 952-595-8000.
